Motivated Computer Science and Data Science student with strong foundations in backend and frontend development. Skilled in Python, Java, JavaScript, and SQL, with hands-on experience building projects such as a Hospital Management System. Adept at debugging, problem-solving, and learning new frameworks quickly. Currently pursuing B.Tech in Computer Science at JNU and BS in Data Science at IIT Madras, with a keen interest in machine learning and scalable web applications. Seeking opportunities to apply technical skills and academic knowledge in internships and collaborative projects.

## WORK EXPERIENCE

### Data Labeling Analyst Simulation — Forage Academy

- Classified customer support messages for intent, sentiment, and PII using a structured schema
- Handled ambiguous cases with clear rationales to ensure consistency
- Reviewed peer labeling, flagged inconsistencies, and suggested guideline improvements
- Applied ethical privacy practices while strengthening skills in human-AI collaboration

## PROJECTS

- JNU Health management system (Python -flask)
- Face Recognition System (Python libraries)
- Snake Game (cpp)
- Weather Prediction
- Content Based Movie Recommender System
- PortFolio
- VocaInk (WhisperApi)

## RELEVANT SKILLS

- Technical Skills: Python, Java, C++,Flask, SQL
- Foundation in IITM BS Degree (Data Science)
- Soft Skills: Teamwork, Problem-Solving, Communication, Time Management

## EDUCATIONAL HISTORY

### HIGH SCHOOL

Passed 2021  
92.83 %

### INTERMEDIATE

Passed 2023  
93.20 %
